

Mark 6 TS

HEEL SEAT AND SIDES LASTING MACHINES

New generation of tacks heel seat and micro-tacks side lasting machines, with on screen programming of the insole profile and simultaneous positioning of the side tacking devices.

ATOM

INCLINED TACKS SYSTEM

The lasting is carried out with 18, 20 or 22 tacks according to the extension of the heel seat in working; the linear tacks loader provides for the tacks distribution with three coaxial distributors, which allow to use tacks of different length simultaneously. The nailing position can be set.

MOULD BLOCKING SYSTEM

A new blocking system of the mould allows to work with the shoe on the machine external position, for manual intervention on the quality and control of the shoe, or with the mould in a fix position to ensure speed in the execution.

ERGONOMIC SETTINGS

Touchscreen adjustable at the operator's choice, simple and intuitive software and unlimited programmable functions.

REMOTE ASSISTANCE

Possibility of remote assistance by PC, for a quick and immediate technical support.
